

2023-2024 XYWAY[®] LFR[®] FUNGICIDE EQUIPMENT PROGRAM

The 2024 FMC Xyway[®] LFR[®] Fungicide Equipment Program provides access to growers who need to use Xyway LFR fungicide on corn, soybeans and cotton via indirect placement that aligns with label requirements per crop i.e., 2x2 inch, 2x2x2 dual-placement, or similar placements. This incentive is designed to reimburse growers, in part, for the cost of equipment used to help experience Xyway LFR fungicide and its game-changing, systemic, inside-out protection.

Growers can earn an incentive of \$2 per acre when applying the full rate of Xyway LFR fungicide to be used toward qualifying equipment purchases up to \$6,000. The rebate cannot exceed the equipment cost, and equipment must be purchased during the current program year July 1, 2023 through June 30, 2024.

QUALIFIED LIST FOR INDIRECT APPLICATION.

- Xyway LFR fungicide equipment, parts, or updated kits
- Tanks for planters or tractors
- Rate controlling systems
- Agitation systems
- Recirculation pumps
- Placement devices

Equipment not on this qualified list must be preapproved by your local FMC retail marketing manager.

“As the industry continues to focus on plant health and fungicide use, Xyway brand fungicides check the boxes for both while minimizing additional costs like aerial application.”
